# Foreword

Columbine. Virginia Tech. Aurora. Oak Creek. Sandy Hook. As if on cue, a sequence of events begins: Multi-media saturation of the tragedy. Fruitless debate about gun control versus 2nd Amendment rights. Calls for a moment of silence and flags lowered to half-mast.

Until the next mass shooting occurs...

After the brutal murders of 20 first-graders and 6 adults in Newtown, Connecticut, I felt compelled to look at the issue of violence more closely and from a different perspective.

**A focus on  
mass shootings  
is misplaced.**

In 2012, a record-breaking 88 deaths received significant media attention, but according to the FBI, 1,214,462 violent crimes occurred nationwide during the same period.<sup>1</sup>

Each year there are 1.3 million victims of physical assault by an intimate partner, 16,800 homicides and 2.2 million medically treated injuries due to intimate partner violence.<sup>2</sup> (Given that domestic violence is one of the most chronically underreported crimes, these figures are conservative.) There are in excess of 3 million reports of child abuse annually that involve more than 6 million children; this earns the U.S. the worst record among industrialized nations, losing five children every day due to abuse-related deaths.<sup>3</sup>

Despite a 45% decrease in violent crime in Hillsborough County since 2008, violence still plagues us. In 2012, there were 4,570 violent crimes<sup>4</sup>, 7,036 domestic violence incidents, and 10,279 reports of child abuse<sup>5</sup>.

**We must make  
meaningful  
policy changes.**

Elected officials are vested with enormous power and authority to solve real problems; by comparison, calling for a moment of silence with flags at half-mast is a grossly inadequate response to senseless acts of violence.

5. *Florida Department of Children and Families 2012 Report*

Harness  
the power of  
collective  
impact.

For decades, we have placed the burden of preventing violence on the very broad shoulders of law enforcement agencies. While law enforcement is critical to the security and safety of any community, its primary focus is enforcement and suppression. We cannot arrest our way to prevention.

The experiences of other communities and public health experts tell us that a paradigm shift is necessary to address the complexity of issues, policies and systems at the core of all forms of violence. Violence has so fully saturated our lives that it occurs in our homes, schools, churches, workplaces, shopping centers and transportation systems. Rather than react to events after they occur, we must turn our sights to the business of preventing violence before injury or death happen in the first place. No single organization can be expected to solve a social problem of this magnitude. No single entity can succeed in isolation.

The Hillsborough County Board of County Commissioners launched the Violence Prevention Collaborative along with the Mayors of Tampa, Plant City, Temple Terrace, the Hillsborough County Sheriff's Office, the Plant City, Tampa and Temple Terrace Police Departments, the School Board of Hillsborough County, the 13th Judicial Circuit Court Chief Judge, the State Attorney's Office, and the Public Defender's Office. These policy makers appointed 77 committee members to serve on seven specialized committees.

We selected Prevention Institute to serve as our expert consultant, based on its track record of developing strategic violence prevention plans that reduce violent crime through a public health approach grounded in science.<sup>6</sup> This is the same methodology used to develop a public health policy requiring the use of seat belts; implemented in 1975, that policy had saved an estimated 255,000 lives by 2008.<sup>7</sup>

Beginning with the premise that violence is preventable, the Collaborative entered into a yearlong process to establish data driven and evidence-based priorities for action. We learned that the implementation of a public health policy

6. Centers for Disease Control at <http://www.cdc.gov/violenceprevention/overview/publichealthapproach.html>

7. Guide to Community Preventive Services. Use of Safety Belts: Enhanced Enforcement Programs. [cited 2010 Nov 24]. Available at URL: <http://www.thecommunityguide.org/mvoi/safetybelts/enforcementprograms.html>

complements the efforts of law enforcement. We named violence for what it is: a public health crisis.

Through facilitated large group dialogue, small group work and individual reflection, the Collaborative prioritized the strengths and needs of Hillsborough County. The Data committee collected 18 data points to provide a snapshot of socio-economic risk and protective factors, crime and school performance statistics unique to Hillsborough County and known to increase or lessen violence in a community. At the request of the Collaborative, the School Board of Hillsborough County, Court Administrator's Office and Public Defender's Office randomly surveyed 1,987 youth, aged 14 - 19, to gather information about their perceptions of relationships and attachments in families, community connectedness, mental health, alcohol and substance abuse issues, and neighborhood deterioration. The University of South Florida (USF) College of Public Health analyzed the frequency data from the survey and provided an executive summary of it and key findings in the population. Throughout the process, specialized subcommittees reviewed all material and made recommendations for violence reduction strategies using the best prevention science available.

We came together for the sole purpose of making a collective investment in the health and safety of our communities and the people who inhabit them. We worked together across agencies, communities and jurisdictions to develop a strategic plan that prevents violence. We committed to change the environment in which we live in order to grow healthy neighbors, families and children.

My deepest appreciation goes to the following individuals for their incredibly hard work and dedication to this project over the past year:

## Leadership Council

**Mayor Bob Buckhorn**  
Vice Chair, City of Tampa

**Mayor Frank Chillura**  
City of Temple Terrace

**The Honorable April Griffin**  
Hillsborough County School Board Member

**The Honorable Julianne Holt**  
Public Defender

**Col. Donna Luszczynski**  
Hillsborough County Sheriff's Office

**The Honorable Manuel Menendez, Jr.**  
Chief Judge, 13th Judicial District

**Michael Sinacore**  
Chief Assistant State Attorney

**Mayor Mary Thomas**  
City of Plant City

## Steering Committee

**Robert Blount**  
Abe Brown Ministries

**Karen Buckenheimer, RN**  
MORE Health

**Dr. Martha Coulter**  
USF College of Public Health

**Chakia Hargrove**  
Private Citizen

**Steve Hegarty**  
Hillsborough County Public Schools

**Daniel Jurman**  
University Area CDC

**Walter Niles**  
Florida Dept. of Health – Hillsborough County

**Kelley Parris**  
Children's Board of Hillsborough County

**Bob Sheehan**  
Hillsborough County

## Alternates To Leadership Council

**Michael Bridenback**  
Court Administrator, 13th Judicial Circuit Court

**Chief Jane Castor**  
City of Tampa

**Holly East**  
Senior Legislative Aide to Commissioner Kevin Beckner

**Marie Marino**  
Public Defender's Office

**Bill McDaniel**  
Assistant City Manager, Plant City

**Mark Cox**  
State Attorney's Office

**Col. James Previtera**  
Hillsborough County Sheriff's Office

**Gerald Seeber**  
City Manager, City of Temple Terrace

**The Honorable Cindy Stuart**  
School Board Member

## Communications

Steve Hegarty, Chair  
J. D. Calloway  
Martin Catala

Hillsborough County

Patti Simmons  
Hills. Co. Public Schools  
Dr. Carla VandeWeerd  
USF/Public Health  
Brandon Wagner  
Hillsborough County

While each and every person involved played an important role in the development of the plan, three members of the team deserve individual recognition:

**Brandon Wagner**, Hillsborough County's Operations and Legislative Affairs Officer, was involved in this project from its inception. His critical thinking and organizational skills were always at work behind the scenes to keep this process in forward motion. Brandon, you are a rising and shining star within our organization. Thank you for all that you do!

**Robert Salmon**, Hillsborough County's Intergovernmental Relations & Special Projects Coordinator, produced our monthly meetings, 24 in all, including logistics, contact lists, webpage updates, citizen inquiries, troubleshooting. He was the point person extraordinaire who insisted there be room for humor in this massive and often messy undertaking. Thank you, Robert, for your attention to detail and commitment to excellence!

My Senior Legislative Aide, **Holly East**, provided unwavering commitment and devotion to the success of this Collaborative and the people of Hillsborough County. She effectively served as the project manager for the initiative, taking on additional responsibilities to ensure that deadlines were met and key decisions were made. Her firm belief that violence is preventable, along with her relentless drive and determination, provided the inspiration beneath the wings of the project and caused it to soar beyond my greatest expectations. We honestly could not have accomplished this without you, Holly. You are simply amazing and I thank you.

I proudly present the Violence Prevention Collaborative Strategic Plan for "**Safe & Sound Hillsborough**", the product of a year of cooperation across sectors that incorporates national best practices and lessons learned for preventing violence, blended with successful intervention and enforcement strategies already in place in our community.

A handwritten signature in blue ink, reading "Kevin Beckner". The signature is stylized with a large, looping "K" and a cursive "Beckner".

**Commissioner Kevin Beckner**  
Hillsborough County Board of County Commissioners  
Chair, Violence Prevention Collaborative

## Vision

Working together to build strong families, safe schools and healthy neighborhoods.

## Community Violence:

Acts of interpersonal violence committed by people who are not related and may or may not know one another. This usually takes place outside the home in public places.

## Values

- Violence is preventable.
- Address the gaps to ensure all children and youth have nurturing and supportive families and communities.
- Build on strengths of youth, families, professionals and community.
- Promote the value of equity and ensure equal opportunities by investing resources where they will have the greatest impact and improving the infrastructure of neighborhoods where social problems have accumulated.
- Focus on those at risk due to exposure to child maltreatment, intimate partner violence and community violence.

The short term outcomes above are the risk and protective factors prioritized by the VPC. These five factors serve as the foundation of the VPC strategic plan. As detailed in the Logic Model (Appendix V), improvements in these five areas will lead to decreases in community violence and an increased sense of safety among young.

## Outcomes - Short Term

### Increase

- Coordination of resources and services among agencies
- Positive relationships and attachments in families
- Community connectedness

### Decrease

- Mental health problems, alcohol and substance use
- Neighborhood deterioration

*“We all have a vested interest in our community at large. Working with the VPC on prevention will impact generations to come.”*

— Michael L. Bridenback,  
Thirteenth Judicial Circuit

## Outcomes - Long Term

### Increase

- Youth feel safe in their school and community
- Prevent community violence

# Local Data

The Centers for Disease Control and Prevention advises that effective initiatives use three types of data to better understand health problems and craft potential solutions. Their standard asks local initiatives to:

-  review the best available research evidence on the topic
-  tap the experiential wisdom of current and historical partners also working the area and
-  survey the current norms and context in the environment where change is desired

Based on that standard the Violence Prevention Collaborative (VPC) has used all three sources of data to guide the Safe and Sound Initiative. Prevention Institute is well-versed in the most current research on community violence prevention and used in-person and online facilitation allow the experiential wisdom (and knowledge of research) of VPC members to guide the strategic plan.

In order to quickly understand the environment, existing data most directly related to community violence and the prevention of community violence was collected and shared (Appendix I and II). A few key risk factors were mapped through a collaborative data sharing process led by the Data Collection Committee. This committee developed six maps showing the geographic distribution of poverty, violence crime, truancy, domestic violence and child abuse (Appendix III). To better understand the perspective of youth culture and the environment surrounding young people in Hillsborough County, a first of its kind survey was created, distributed and analyzed through a collaborative effort of VPC members (Appendix IV). Additional recent reports also added valuable information including the Health Care Advisory Board Mental Health Task Force Report on Mental Health and Hillsborough County Health Rankings.

# A Public Health Approach

## Moving Upstream

While walking along the banks of a river, a passerby notices that someone in the water is drowning. After pulling the person ashore, the rescuer notices another person in the river in need of help. Before long, the river is filled with drowning people, and more rescuers are required to assist the initial rescuer.

Unfortunately, some people are not saved, and some victims fall back into the river after they have been pulled ashore. At this time, one of the rescuers starts walking upstream.

“Where are you going?” the other rescuers ask, disconcerted. The upstream rescuer replies, “I’m going upstream to see why so many people keep falling into the river.”

As it turns out, the bridge leading across the river upstream has a hole through which people are falling. The upstream rescuer realizes that fixing the hole in the bridge will prevent many people from ever falling into the river in the first place.

## Community Violence is Preventable

Violence is among the most serious health threats in the nation today. It is a leading cause of injury, disability and premature death, and it jeopardizes public health and safety. It represents a significant disparity by disproportionately affecting young people and people of color, and it increases the risk of other poor health outcomes. The devastating social impacts of violence include diminished academic achievement, employment productivity, and the deterioration of families and communities.

### Oakland

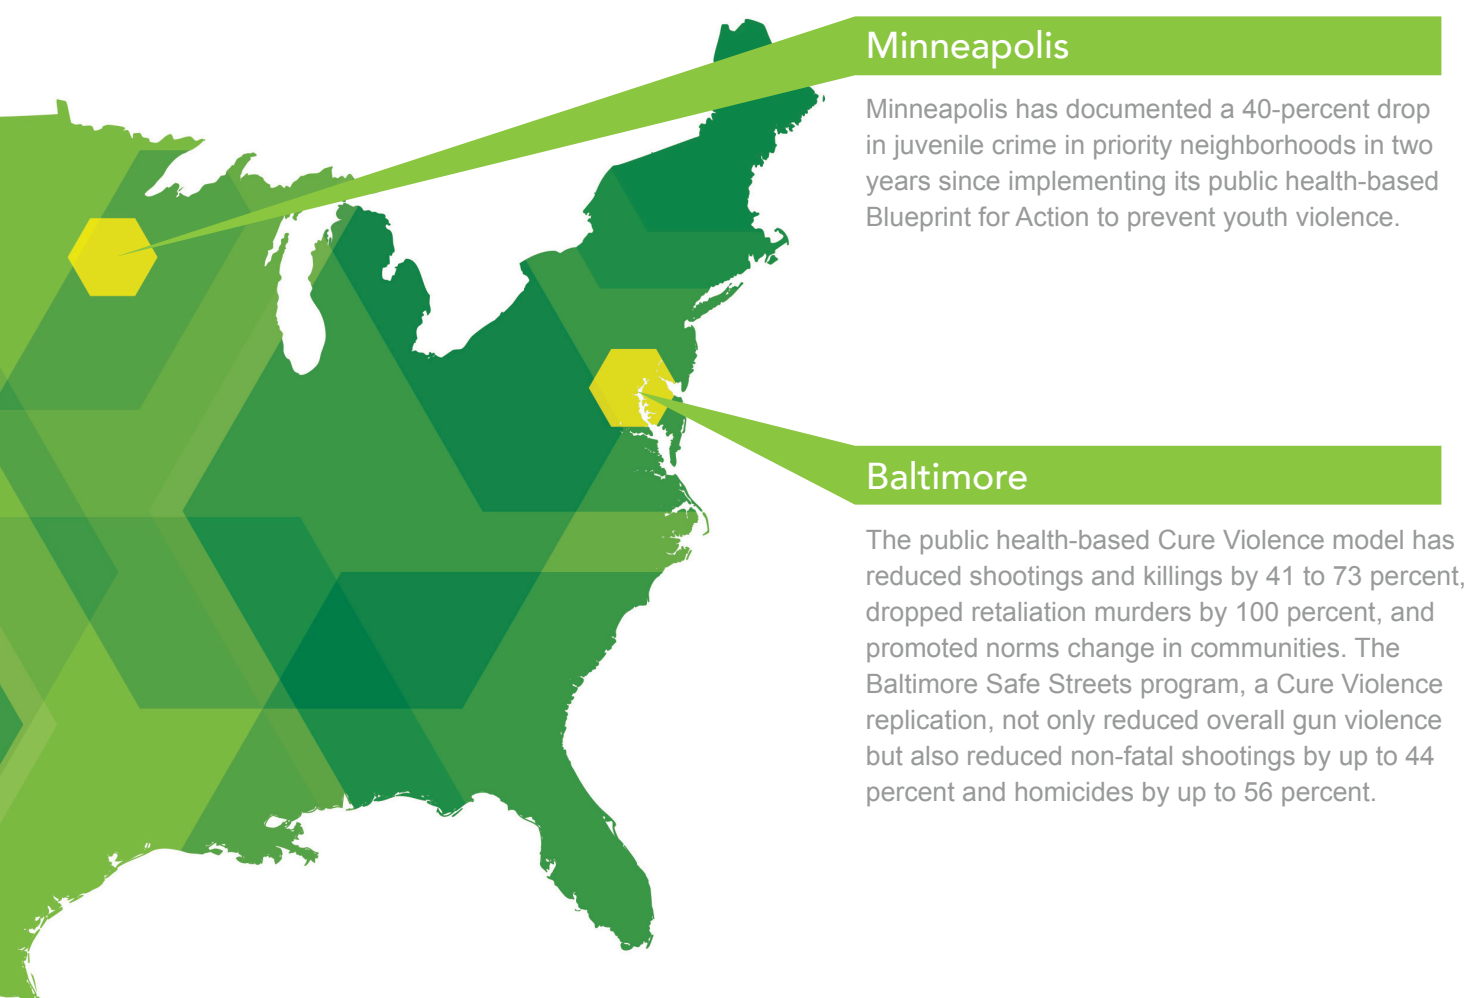

Oakland's City-County Neighborhood Initiative engages residents from Sobrante Park in community-strengthening efforts such as neighbor-to-neighbor bartering and youth economic development programs. Evaluation shows a more than 40-percent reduction in Sobrante Park's violent crime between 2004 and 2007, even as overall rates of violent crime in Oakland increased.

### The Nurse Family Partnership

The Nurse Family Partnership trains public health nurses to make regular home visits to low-income, first-time mothers. Children who did not participate were up to twice as likely to be arrested by age 15, compared to children involved in the program, and a RAND study demonstrated that the program saves at least \$4 for every \$1 spent.

Mayors and police chiefs are increasingly asserting that we cannot arrest our way out of this problem. As a result, the U.S. Conference of Mayors adopted a resolution naming youth violence a public health crisis and urged local governments to recognize youth violence as a public health epidemic that requires a sustained multi-faceted approach focused on prevention. Violence is a learned behavior that can be unlearned or not learned in the first place; it is preventable. Prevention strategies have a demonstrated track record in reducing violence. For example:

Understanding violence as a public health issue acknowledges that it can be prevented. It maximizes limited resources and moves from treating the effects of violence after the fact to stopping it from happening in the first place. It also calls us to understand that effective prevention cannot be directed to individuals, but must include a comprehensive community focus. Understanding the root causes of a disease, injury or behavior can better inform effective prevention strategies. “Moving upstream,” i.e., taking action before a problem arises in order to avoid it entirely, rather than treating or alleviating its consequences, is called primary prevention.

## Background: Three Keys to Preventing Violence

### Key 1

The Three Keys to Preventing Violence are the core steps in successful efforts to prevent violence. This comprehensive framework relies on successful collaboration with public health, local government, law enforcement, social services and educational organizations.

#### **Violence Requires a Comprehensive Approach**

The causes of violence are multiple and interrelated. A successful strategy must involve community collaboration and include activities in every level of the Spectrum of Prevention. Developed by Prevention Institute Executive Director Larry Cohen, the Spectrum of Prevention identifies six levels for activity that are necessary for developing a sustainable prevention initiative:

#### **Spectrum of Prevention<sup>8</sup>**

Level of Spectrum	Definition of Level	Examples
Influencing Policy and Legislation	Developing strategies to change laws and policies to influence outcomes	Establish joint-use policies between schools, community-based organizations, and others to increase after-school programming and opportunities for youth
Changing Organizational Practices	Adopting regulations and shaping norms to improve health and safety	Intentionally increasing meaningful youth employment opportunities in the community
Fostering Coalitions and Networks	Bringing together groups and individuals for broader goals and greater impact	Engage grassroots, community-based organizations and sectors of government
Educating Providers	Informing providers who will transmit skills and knowledge to others	Train teachers to build skills to interrupt inappropriate comments and promote behaviors that foster nonviolence
Promoting Community Education	Reaching groups of people with information and resources to promote health and safety	Stage community performances that reinforce positive cultural norms and change the existing culture of violence
Strengthening Individual Knowledge and Skills	Enhancing an individual's capacity to prevent injury and promote safety	Train youth and provide them with important job skills

### Key 2

#### **Risk and Resilience Factors Must be Addressed**

Successful violence prevention requires strengthening factors that protect and support individuals, families and communities, as well as reducing factors that threaten well-being. Research demonstrates the inter-relationship between risk and resilience—resilience has the ability to mitigate the effects of some risks, for example—so it is important to focus on both sets of factors.

### Key 3

#### **Preventing Violence Requires an Integrated Strategy for Action**

Successful efforts to prevent violence require an understanding of the policies, and systems that affect individuals, families and communities. That understanding must be integrated into an action plan that strategically coordinates, supports and strengthens multiple efforts across all levels of the Spectrum of Prevention.

# Goals, Strategies, Activities for the Violence Prevention Collaborative

The Strategic Plan offers a structure to unite the efforts of those involved in criminal justice, economic development, education, community building and health. It was created with the understanding that success is derived from the collective action and alignment of all the sectors. With this commitment to accountability, representatives from multiple committees acknowledged that while their roles might be different, all of the work is complementary and essential to a Safe and Sound Hillsborough.

## Goal: Support the Health and Well-Being of all Families

### Strategies

- Mental health support
- Substance abuse prevention
- Economic development and job opportunities
- Successful re-entry
- Family support services

## Recommendations Community

- Develop school-based family support systems including coordinated cross-sector diagnostic systems and practices for identifying and supporting families and youth at risk. Include home visitation, integrated, comprehensive case management, mental health and substance abuse services, and bilingual services.
- Reentry: Create more viable connections between communities and inside detention facilities, provide incentives for hiring ex-felons, and support transition from detention to the community through mental health services, substance abuse treatment, job training and employment services, and supports for family members.
- Offer coordinated mental health services in schools.
- Foster parent-school relationships: Enhance adult involvement and presence on school campuses, through opportunities for parental/caregiver participation in school day activities.
- Increase Economic Stability: Advocate for policies that ensure community members can earn a living wage and access to local employment. Tie job training and placement programs for community residents to neighborhood beautification and maintenance, infrastructure and commerce development, and female economic empowerment.
- Engage Businesses: Support business development districts and other community-level efforts that increase economic growth and sustainability. Highlight fiscal benefits of improving community appearance and social cohesion to recruit local businesses.

## Family

- Family support: Provide case management, family support and coordinated service provisions to support families in highly-impacted neighborhoods. Expand support services for new parents and families, so parenting classes and home visitation programs become community-wide affairs, emphasizing community connections and support.
- Parenting skills: Integrate parenting skills and child development classes into pre- and post-natal healthcare and other settings for parents. Offer universal classes to parents and other caregivers on developmental milestones and culturally appropriate, effective parenting practices to support a nurturing, safe, structured environment for children and youth, including the ability to recognize risk factors and to know what to do and where to get help.

## Individual

- Peer support for parents: Establish drop-in Parent Centers where parents who may be isolated during the day can connect with other parents and community services through service projects, literacy or other adult education classes and support groups.

## Goal: Cultivate a Connected Community

### Strategies

- Quality education and school climate
- Social connections in neighborhoods

## Recommendations

*“Having regular community activities that are positive in nature and not organized around a traumatic event is critical to building community. There has to be consistency so the ways in which people experience the community starts to shift on a daily basis and is sustained for a prolonged period of time.”*

- Howard Pinderhughes  
UC San Francisco

*“It is exciting to see a plan to improve and restore neighborhoods where the need is greatest in order to prevent violence.”*

- Trish Waterman,  
Administrative Office of the Courts  
Children’s Justice Center

**Access to Public Spaces:** Ensure community members have access to safe, clean and inviting public spaces in order to foster resident interaction, relationship building and trust. In addition to outdoor parks and town squares, increase access to cultural spaces including libraries and museums. Elements of safe spaces include: well maintained, proper lighting, adequate sidewalks, a sense of openness and an absence of trash and debris.

**Honor Culture:** Celebrate community culture and engage community members in cross-cultural celebrations and exchanges.

**Restorative Justice:** Implement restorative justice programs with community organizations and the justice system.

**Out-of-School Time (OST):** Utilize OST activities to provide opportunities for youth to build relationships with positive peer groups. OST opportunities offer youth meaningful ways to influence the world around them, nurture their interests and talents, practice and enhance their skills and competencies, and increase their connectedness to community.

**Peer Support:** Foster community connectedness by sponsoring social activities in areas with the highest concentration of caseloads and community violence. Activities would foster trust, build skills, and bring residents together.

**Nurture Parent-School Relationships:** Enhance adult involvement and presence on school campuses, by expanding opportunities to participate in school-day activities. Utilize schools and other local institutions as hubs to foster connection among residents.

**Intergenerational Connections:** Intergenerational connections foster community connectedness and support healthy youth development. Build up the places and spaces where intergenerational connections exist to make these types of relationships common.

**Celebrate role models:** Highlight the contributions of existing community role models and natural mentors to emphasize understanding in the community about the importance of adult relationships to youth and provide model relationships.

## Goal: Improve Conditions in Neighborhoods Most Impacted by Violence

### Strategies

- Neighborhood environment
- Trauma-informed systems

## Recommendations

*“None of us can tackle these massive issues alone. If we can create critical mass by all moving in the same direction together, then we can make real progress with individuals, institutions, communities and our policies.”*

- Dan Jurman  
University Area Community  
Development Corporation, Inc.

**Access to Public Spaces:** Ensure community members have access to safe, clean, and inviting public spaces in order to foster resident interaction, relationship building, and trust. In addition to outdoor parks and town squares, increase access to cultural spaces including libraries and museums. Elements of safe spaces include: well maintained, proper lighting, adequate sidewalks, a sense of openness and an absence of trash and debris.

**Physical Appearance:** Improve the physical appearance of neighborhoods by fostering arts programs and community gardens, improving park and neighborhood maintenance, and removing graffiti and blight.

**Decreased Alcohol Availability:** Decrease the density of alcohol outlets and related advertising in neighborhoods afflicted with high crime and violence.

**Day of Service:** Host community-wide volunteer days throughout the year to encourage community members to work together, support each other, harness community assets, and enhance their neighborhood.

**Trauma-Informed Services:** Provide trauma-informed services to both parents and children who may have been exposed to violence. For parents, such services should be provided to support their capacity to provide their children with emotional security and support their healthy development. Ensure that all sectors understand the impact of trauma at the individual, family and community level, and help them to integrate this understanding into their own policies and practices.

**Trauma-Informed Approach:** In addition to providing trauma-informed services to individuals, adopt a trauma-informed approach to community meetings and projects. Support communities so they heal from violence and can take collective action to prevent future violence. Healing circles can bring people together and provide a way to start mending rifts in community connections.

## Goal: Coordinate Efforts to Maximize our Impact

Strategies

- Coordinated approach

## Recommendations

*“Meeting with different sectors in the same room for the planning process showed me how much we rely on the knowledge of others and how important it is to work together rather than trying to prevent violence alone.”*

- Chakita Hargrove, Faith-based  
Community Subcommittee Chair

*“When community partners and other stakeholders sit at the same table from inception to execution, it’s a great opportunity for input, partnerships, and collaboration toward a common goal.”*

- Captain Scott Wellinger  
Hillsborough County Sheriff’s Office  
Homeland Security Division

**Violence Prevention Coordinator:** Design and implement policy that establishes a violence prevention coordinator position. This role can carry out major responsibilities associated with successful implementation of prevention efforts, such as promoting accountability, acting as a neutral organizer and working with all relevant stakeholders at all levels.

**Coordinate Multi-Sector Initiatives:** The public sector can more effectively coordinate departments and jurisdictions to maximize efficiency, leverage limited resources, and model collaboration. This includes coordination with complimentary initiatives such as the County’s recent Mental Health initiative.

**Ensure initiative impacts all residents:** Consider establishing geographic or demographic specific areas of focus to ensure those most impacted benefit from the work. Using the data collected (maps, indicators and surveys), assess the relevance of focuses on specific populations or zip codes for prioritized services.

**Increase Capacity:** Offer continued opportunities for VPC members and partners to better understand efforts at the community and societal level, new research and trends in preventing violence. Invest more strategically to increase capacity to achieve violence prevention.

**Develop Shared Outcomes to Measure Accountability.** Agree on short and longer-term outcomes that provide evidence that a prevention program is making a difference and develop a method to track, assess, align and leverage resources. Not only do these measures ensure that public funds are being used efficiently, they also provide a framework for evaluating the effectiveness of violence prevention programs and services, and enhance opportunities to attract funding from outside sources.

**Coordinate Data Systems:** Establish data systems that enable effective tracking and sharing of risk and resilience factors, indicators and milestones associated with preventing violence to inform policy and enable sound decision-making across departments and agencies.

**Early Intervention:** Create processes for systems to take action at the very first signs of risk for involvement in violence. Such action can include intervening with youth who have issues with truancy, meeting curfew and low-level offenses, addressing and directing services toward youth who have been victims or who are at risk of becoming victims of street or community violence, and targeting outreach and community-based programming to disconnected youth.

# Appendix I: Data Table

In 2011 the Community Safety Scorecard for Los Angeles was developed by UCLA and the Advancement Project. Through their extensive research they identified protective, and risk factors were most strongly related to safety indicators. From this list, the researchers from Healthy City, Urban Peace, and The Violence Prevention Coalition of Greater Los Angeles selected the most relevant indicators for the purpose of the Community Safety Scorecard.

In their work, which Hillsborough has built upon here, the indicators were grouped into four broad categories: safety, school, risk factors and protective factors. Each category of the Scorecard had a minimum of three indicators. For example, indicators for the safety category included: gang-related crime rate per 1,000 residents, violent crime rate per 1,000 residents, and child abuse rate per 1,000 children. Below are the 19 Data Indicators adopted by the VPC as a way to better understand the problem of community violence but also the risk and resilience factors that can prevent it.

INDICATOR	YEAR	SOURCE	DATA	SOURCES/COMMENTS
1. Gang Related Crime	2012	HCSO	643 arrests (+37.98%)	Data drawn from HCSO arrests marking gang activity and TPD incident reports indicating gang activity. This data is reported separately for discussion, but the data is not comparable.
		TPD	930 incidents (-7.96%)	
2. Violent Crime	2012	FDLE	4,570 (-1.3%)	FBI Part 1 Index Crimes
3. Child Abuse (total reports)	2012	DCF	2,434 Verified abuse	Includes all 20 factors from the DCF Maltreatment Index and is drawn from HCSO Child Protective Investigation Division Sheltered Children for physical abuse cases, including sexual battery. Summary data from Child Protective Services reflects initial removal of child from home due to evidence of abuse. Child abuse is defined in F.S.S. 827.03. Neglect cases are reflected in data.
	2013	CPS	2,713 Verified Cases	
4. Domestic Violence	2010-2013	HCSO SAO	14,230 (verified arrest data)	DV Statistics were drawn from the "charge books (codes)" maintained by SAO and HCSO, and reflect arrests for crimes with DV component.

INDICATOR	YEAR	SOURCE	DATA		SOURCES/COMMENTS
5. High School State Assessment Score	2013	HCSB	Algebra EOC Test		<p>FCAT Scores are not averaged and percentages reflect scores above satisfactory level (Level III or above). Grade 11, 12 do not take state assessments. Both FCAT and end-of-course scores affect school grade.</p> <p>Data related to assessment is defined in Florida State Statute 1003.428. Percentages represent students assessed at satisfactory or above. Percentiles represent the percentage of students assessed lower on continuum.</p> <p>Updated statistics from HCSB with following notations;</p> <p>Judgment about Alt. Ed. Scores is difficult because students have often arrived shortly before testing date and do not stay for extended periods. Scores do not reflect work of Alt. Ed. Teachers.</p> <p>Algebra EOC scores may appear lower because students usually take and pass these tests in Middle School indicating that HS students failed in Middle School or are otherwise struggling in math.</p>
			% below satisfactory	% above satisfactory

# Appendix II: Detailed Data Definitions for the 19 Indicators

## **Active Voting Population – Hillsborough County Supervisor of Elections**

According to the Supervisor of Elections Office there were 747,605 active registered voters in the 2012 general elections. 545,134 actually voted for a 72.92% turnout.

In 2012 the U.S. Census reported that 58.2 % of total population voted in national election, 63.6% of the citizen population voted in the national election, and 89.65 of registered voters voted in the national elections. The U.S. Census Bureau and the Federal Elections Commission report voter registration and voter turnout using ratios between total populations (those over the age of 18), citizen population (those over 18 and U.S. citizens) and registered voters. There is only one state that does not require voter registration.

## **Census Bureau Data**

Based on 2012 American Community Survey 5 year estimate (direct link to the county wide data can be found at:

[http://factfinder2.census.gov/bkmt/table/1.0/en/ACS/12\\_5YR/B17010/0500000US12057](http://factfinder2.census.gov/bkmt/table/1.0/en/ACS/12_5YR/B17010/0500000US12057).

## **Child Abuse (Statute Definition)**

F.S. 827.03 Abuse, aggravated abuse, and neglect of a child; penalties.—

(1) DEFINITIONS. As used in this section, the term:

(a) “Aggravated child abuse” occurs when a person:

1. Commits aggravated battery on a child;
2. Willfully tortures, maliciously punishes, or willfully and unlawfully cages a child; or
3. Knowingly or willfully abuses a child and in so doing causes great bodily harm, permanent disability, or permanent disfigurement to the child.

(b) “Child abuse” means:

1. Intentional infliction of physical or mental injury upon a child;
2. An intentional act that could reasonably be expected to result in physical or mental injury to a child; or
3. Active encouragement of any person to commit an act that results or could reasonably be expected to result in physical or mental injury to a child.

(c) “Neglect of a child” means:

1. A caregiver’s failure or omission to provide a child with the care, supervision, and services necessary to maintain the child’s physical and mental health, including, but not limited to, food, nutrition, clothing, shelter, supervision, medicine, and medical services that a prudent person would consider essential for the well-being of the child; or
2. A caregiver’s failure to make a reasonable effort to protect a child from abuse, neglect, or exploitation by another person.

The cited DCF information is drawn from the DCF Public Website for 2012. The data provides a total of 10, 279 reports of child abuse. Investigation of those complaints lead to conclusions that 2,434 cases were verified instances of child abuse, 3,837 cases indicated abuse may have occurred, and 4008 cases in which no abuse was indicated.

The cited Hillsborough County Sheriff's Office (HCSO) data includes all 20 factors from the DCF Maltreatment Index and is drawn from HCSO Child Protective Investigation Division Sheltered Children for physical abuse cases, including sexual battery. Summary data from Child Protective Services reflects initial removal of child from home due to evidence of abuse.

### **Domestic Violence (Statute Definition)**

F.S.741.28 Domestic violence; definitions.-As used in ss. 741.28-741.31:

- (1) "Department" means the Florida Department of Law Enforcement.
- (2) "Domestic violence" means any assault, aggravated assault, battery, aggravated battery, sexual assault, sexual battery, stalking, aggravated stalking, kidnapping, false imprisonment, or any criminal offense resulting in physical injury or death of one family or household member by another family or household member.
- (3) "Family or household member" means spouses, former spouses, persons related by blood or marriage, persons who are presently residing together as if a family or who have resided together in the past as if a family, and persons who are parents of a child in common regardless of whether they have been married. With the exception of persons who have a child in common, the family or household members must be currently residing or have in the past resided together in the same single dwelling unit.
- (4) "Law enforcement officer" means any person who is elected, appointed, or employed by any municipality or the state or any political subdivision thereof who meets the minimum qualifications established in s. 943.13 and is certified as a law enforcement officer under s. 943.1395.

DV Statistics were drawn from the "charge books (codes)" maintained by SAO and HCSO, and reflect arrests for crimes with DV component.

### **End of Class (EOS) Assessments – Florida Department of Education**

The Florida EOC Assessments are part of Florida's Next Generation Strategic Plan for the purpose of increasing student achievement and improving college and career readiness. EOC assessments are computer-based, criterion-referenced assessments that measure the Next Generation Sunshine State Standards for specific courses, as outlined in their course descriptions. The first assessment to begin the transition to end-of-course testing in Florida was the 2011 Algebra 1 EOC Assessment. Biology 1 and Geometry EOC Assessments were administered for the first time in spring 2012, and the U.S. History EOC Assessment was administered for the first time in spring 2013. The Civics EOC Assessment will be administered for the first time in spring 2014. Achievement

Levels for the Algebra 1, Biology 1, and Geometry EOC Assessments were established through a standard-setting process. This process will be followed again for the U.S. History and Civics EOC Assessments. Data related to assessment is drawn based on standards in Florida State Statute 1003.428.

### **FCAT Assessment – Florida Department of Education**

The FCAT 2.0 measures student achievement of the Next Generation Sunshine State Standards in reading, mathematics, science, and writing. New Achievement Levels for FCAT 2.0 Reading and Mathematics were approved in 2011 and for FCAT 2.0 Science in 2012 through a standard-setting process.

FCAT Scores are not averaged. Grade 11, 12 do not take state assessments. Both the FCAT and end-of-course scores affect school grade. Data related to assessment is drawn based on standards in Florida State Statute 1003.428.

### **Fully Credentialed Teacher – Hillsborough County School System**

Fully credentialed indicates the teacher holds a valid Florida Teaching Certificate. Credentialing data drawn based on guidelines contained in School Board Policy 3120.

### **Gang Activity (Statute Definition)**

F.S. 874.03 Definitions.-As used in this chapter:

- (1) "Criminal gang" means a formal or informal ongoing organization, association, or group that has as one of its primary activities the commission of criminal or delinquent acts, and that consists of three or more persons who have a common name or common identifying signs, colors, or symbols, including, but not limited to, terrorist organizations and hate groups.
  - (a) As used in this subsection, "ongoing" means that the organization was in existence during the time period charged in a petition, information, indictment, or action for civil injunctive relief.
  - (b) As used in this subsection, "primary activities" means that a criminal gang spends a substantial amount of time engaged in such activity, although such activity need not be the only, or even the most important, activity in which the criminal gang engages.
- (2) "Criminal gang associate" means a person who:
  - (a) Admits to criminal gang association; or
  - (b) Meets any single defining criterion for criminal gang membership described in subsection.
- (3) "Criminal gang member" is a person who meets two or more of the following criteria:
  - (a) Admits to criminal gang membership.
  - (b) Is identified as a criminal gang member by a parent or guardian.
  - (c) Is identified as a criminal gang member by a documented reliable informant.
  - (d) Adopts the style of dress of a criminal gang.
  - (e) Adopts the use of a hand sign identified as used by a criminal gang.

- (f) Has a tattoo identified as used by a criminal gang.
  - (g) Associates with one or more known criminal gang members.
  - (h) Is identified as a criminal gang member by an informant of previously untested reliability and such identification is corroborated by independent information.
  - (l) Is identified as a criminal gang member by physical evidence.
  - (j) Has been observed in the company of one or more known criminal gang members four or more times. Observation in a custodial setting requires a willful association. It is the intent of the Legislature to allow this criterion to be used to identify gang members who recruit and organize in jails, prisons, and other detention settings.
  - (k) Has authored any communication indicating responsibility for the commission of any crime by the criminal gang.
- (4) "Criminal gang-related activity" means:
- (a) An activity committed with the intent to benefit, promote, or further the interests of a criminal gang, or for the purposes of increasing a person's own standing or position within a criminal gang;
  - (b) An activity in which the participants are identified as criminal gang members or criminal gang associates acting individually or collectively to further any criminal purpose of a criminal gang;
  - (c) An activity that is identified as criminal gang activity by a documented reliable informant; or
  - (d) An activity that is identified as criminal gang activity by an informant of previously untested reliability and such identification is corroborated by independent information.

Data drawn from HCSO arrests marking gang activity and TPD incident reports indicating gang activity. This data is reported separately for discussion, but the data is not comparable. Data collected through the crime analysis units of the respective agencies.

#### **Government Allocations to Non-Profits**

Each cited allocation to non-profits is provided by the allocating agency. Each agency provided the identity of the allocation recipient as it is recorded on their records. For discussion purposes the total allocation for each agency is presented on the spreadsheet with the publicly reported total budget for the matching fiscal year, and the percentage of total budget the allocation represents. Reporting periods for each agency are not alike, but none are older than FY 2012.

#### **Graduation Rates – Hillsborough County School System**

Special diplomas and GED's do not count in the graduation rate. Graduation data drawn based on guidelines contained in Florida State Statute 1003.428.

#### **Graduation Rates – National Governor's Association**

This data includes GED and special diplomas in graduation rates. This presented for discussion and is not comparable data to graduation rate as defined by the State of Florida and the Hillsborough County School Board.

### **Poverty Levels**

For a Family of Four (4) –

Qualifying Income for free lunch program is \$30,615. This information was provided by the Hillsborough County School Board.

2014 Medicaid and Children's Health Insurance Program qualifying income is \$23,850 (100% Federal Poverty Level). <http://familiesusa.org/product/federal-poverty-guidelines>

### **School Truancy – Hillsborough County School System**

At least 30 unexcused absence days in a 180-day period. Data is drawn based on truancy definition in School Board Policy 5200.

### **Violent Crime**

The FBI Uniform Crime Reporting (UCR) Program collects data about **Part I** offenses in order to measure the level and scope of crime occurring throughout the Nation. The Program's founders chose these offenses because they are serious crimes, they occur with regularity in all areas of the country, and they are likely to be reported to police. The **Part I** offenses are:

#### **Criminal homicide-**

a.) Murder and non-negligent manslaughter: the willful (non-negligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. The Program classifies justifiable homicides separately and limits the definition to:

(1) The killing of a felon by a law enforcement officer in the line of duty; or (2) the killing of a felon, during the commission of a felony, by a private citizen.

b.) Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded.

**Forcible rape** - The carnal knowledge of a female forcibly and against her will. Rapes by force and attempts or assaults to rape, regardless of the age of the victim, are included. Statutory offenses (no force used —victim under age of consent) are excluded.

**Robbery** - The taking or attempted taking of anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

**Aggravated assault** - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

**Burglary (breaking or entering)** - The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

**Larceny-theft (except motor vehicle theft)** - The unlawful taking, carrying,

leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, worthless checks, etc., are excluded.

**Motor vehicle theft** - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on land surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

**Arson** - Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## Appendix III: Data Maps

The Data Subcommittee, in partnership with the Leadership Council, coordinated data sharing between local agencies to develop six maps that visually display concentrations of key risk factors for community violence across Hillsborough County.

Child Abuse

Domestic Violence

Violent Crime

Families in Poverty

Middle School Truancy

High School Truancy

### An Orientation to Hillsborough County

Hillsborough County is a metropolitan area situated on the west side of Florida, spanning a total area of 1,020.21 square miles with 158 miles of shoreline on Tampa Bay. The 2013 population estimate for the state of Florida is approximately 19.5 Million with Hillsborough County accounting 1.2 Million of those residents, making Hillsborough Florida's 4th most populous county. Almost one quarter of its residents are under the age of 18 years. The racial/ethnic make-up of Hillsborough County is relatively diverse, with the majority of residents identifying as White, non-Hispanic (53%), followed by Hispanic/Latino (26%), Black/African American, non-Hispanic (17%), and Asian (2%). Approximately one-quarter of Hillsborough County residents speak a language other than English at home. The median household income in Hillsborough is \$49,450 with per capita income at \$26,947. Fifteen percent of the population lives below the poverty level and the 2013 unemployment rate was similar to surrounding counties at 6.7%. According to the US Census, 86% of Hillsborough County residents over the age of 25 completed high school and 29% have a bachelor's degree or higher.

Community violence is a concern in the state of Florida and likewise for residents of Hillsborough County. Each year, community violence in its varying forms affects thousands of men, women, children and seniors living in Hillsborough County. The Violence Prevention Collaborative broadly defines community violence as acts of interpersonal violence committed by people who are not related and may or may not know one another. This usually takes place

outside the home in public places. Research indicates that a great deal of violent behavior is learned from experiencing or witnessing violent behavior by others, particularly those who are role models. Violence is learned in families, communities, and cultures. Violence can encompass a broad range of mistreatment types including child abuse, elder mistreatment, domestic violence, gang violence and violent crime such as homicide, robbery, rape and aggravated assault, and it occurs at alarming rates. In Hillsborough County for example, Child Protective Services (CPS) verified 2,713 cases of child abuse in 2012, and the Hillsborough County Sheriff's office made 643 arrests for gang related crime – a 38% increase over prior years. Additionally, domestic violence is a significant concern. Florida Department of Law Enforcement data indicate that in 2013 domestic violence offenses occurred at a rate of 560.9/100,000 in the state of Florida and at a rate of 529.5/100,000 in Hillsborough County. Recently available data for Hillsborough County also indicate that rates of forcible rape, threat/intimidation, manslaughter and murder all rose compared to the previous year, and in 2012 4,570 arrests were made in Hillsborough County for violent crimes. With this data in mind, the Violence Prevention Collaborative was formed in 2013 with the goal of reducing violence in the county by preventing violence before it occurs.

### **History and Structure of the Violence Prevention Collaborative**

In April of 2013, Commissioner Kevin Beckner suggested to the Hillsborough County Board of County Commissioners (BOCC) the formation of a Violence Prevention Collaborative taskforce structured around a data-driven, evidence-based process that shifts policy for addressing violence in our community from a model focused solely on a traditional law-enforcement approach, to a model that builds on existing law enforcement strategies through the addition of a broad-based public health perspective. As such, this model looks beyond criminal justice and law enforcement issues to explore the root causes of violence and to prevent it before it happens in the first place. The BOCC unanimously approved the concept.

The leadership of the Violence Prevention Collaborative is comprised of elected officials heading nine governmental agencies or entities: the Hillsborough County Board of County Commissioners, the cities of Tampa, Plant City, Temple Terrace, the Hillsborough County Sheriff's Office, the School Board of Hillsborough County, the 13th Judicial Circuit Court Administrator's Office, the State Attorney's Office, and the Public Defender's Office. These public servants comprise the Leadership Council.

The Leadership Council members appointed 77 individuals to serve on 7 specialized committees: Community Organizations, Communications, Data Collection, Education, Faith-Based Organizations, Public Safety/Judiciary, and Health Care (which includes mental health and substance abuse). The chairs of these committees, all experts in their field who bring a wealth of professional knowledge to this issue, form the Steering Committee.

The goal of the Collaborative was to craft a comprehensive strategic plan to prevent violence, and to develop infrastructure that works in unison across sectors to implement the plan county-wide. A first step in this strategic plan was to conduct a youth outreach survey in Hillsborough County to assess their perspective on violence, as well as potential risk and resilience factors.

### **Youth Outreach Survey**

Survey research has identified risk and resilience factors that predict and prevent violence. Using a facilitated large group dialogue process, the Collaborative identified and prioritized the factors specific to Hillsborough County. It then sought input from youth in order to learn their perceptions of positive relationships and attachments in families, community connectedness, mental health, alcohol and substance abuse issues, and neighborhood deterioration. At the request of the Collaborative, the School Board of Hillsborough County, the Court Administrator's Office and the Public Defender's Office agreed to administer a survey to youth, grades 9 - 12 or aged 14 - 19.

The survey instrument used in Hillsborough County was developed by selecting items from existing surveys that have been used by other groups to measure youth violence with a specific focus on collecting information to prioritize risk and resilience factors likely to be salient in Hillsborough County. It consisted of 63 questions. Fifty-one (51) were borrowed from the Harvard Youth Violence Prevention Center's Boston Data Project, and focus on understanding risk and protective factors for violence. Nine (9) questions concerning mental health, alcohol and drug use were taken from the Center for Disease Control's (CDC) Youth Risk Behavior Survey, most recently administered to students in Duval County, Orange County, Broward County, Miami-Dade, and Palm Beach County in 2013. Three (3) questions about family connection are from the California Healthy Kids Survey, the largest statewide survey in the nation.

### **Project Sample**

Data for this survey were solicited from approximately 3,500 youth in Hillsborough county through their attendance at one of 27 Hillsborough County Public Schools (N=100 kids per school), or through their participation in Hillsborough County Adult Education Programs (N=210), Court Administrator Civil Citation/Diversion education programs (N=100), or through Public Defender/ Court Involved Detention Programs (N=500) via the method outlined in Table 1. In total, 1,987 surveys were returned, yielding an overall response rate of 56.8%. Once the data were collected, cleaned and entered into an SPSS data base by members of The Hillsborough County School Board, a de-identified copy of the data set was made available for the purpose of this analysis.

**Table 1: Subject Recruitment**

Sample Site	Number of Youth Solicited	Method/Data of Selection	Number of Surveys Returned	Response Rate
27 HCPS High Schools @ approx 100 students per site	2700	HCPS surveyed one (1) Psychology I, Psychology II, or Sociology class at each high school in the Hillsborough County School System between Monday, April 7, 2014 and Friday, April 18, 2014	1664	62%
HCPS Adult Education/GED	210	Adult Education Students (GED) aged 14-19 were surveyed between Monday April 7, 2014 and Friday April 18, 2014.	210	100%
Court Administrator: Civil Citation/ Diversion	100	The Court Administrator's Office randomly administered the survey to youth aged 14-19 involved in Civil Citation or other diversion programs, between Tuesday, March 25 and Tuesday, April 22, 2014.	22	22%
Public Defender: Court Involved/ Detention	500	The Public Defender's office randomly administered the survey to 1st time offending, Court-involved and Detention youth between Tuesday, March 25 and Tuesday, April 22, 2014.	91	18%

## Results

Preliminary analysis of the youth outreach survey is focused on describing the nature and viewpoints of participating youth as the basis for developing an in-depth analytic plan which will serve as the foundation for comprehensive reporting in Step 2 of this project. Demographics for the overall sample are reported in Table 2 and are broken down by gender. Data are further broken down by recruitment source (traditional high school, GED, diversion, and detention) in Table 3.

Approximately 58% of youth responding were female and roughly 41% reported that they were of Hispanic or Latino decent. Forty-five percent of respondents reported their race as white, 22.1% reported their race as Black, and 6.2% of respondents indicated they were Asian or South Asian. Overall, the majority of youth responding to the survey indicated the presence of adults as active participants in their lives. Eighty-two percent reported having an adult they could talk with, 85% indicated having an adult in their life who expected them to follow the rules, and 95% reported having an adult in their life who is interested in their school work. By contrast however, only 52.1% of children reported the presence of an adult role model in their lives.

Many of the youth in the survey reported challenges in their communities related to sense of belonging and social cohesion. More than 30% of youth participating in the outreach survey indicated that they do not feel that adults in their neighborhood can be counted on to ensure that children are safe and stay out of trouble and 34% of children report that parents in their communities do not know their friends. Additionally, 24% of children do not think that people in their neighborhoods can be trusted and 35% of youth participating in the survey feel that people in their neighborhoods are not willing to help one another. By contrast, students felt a strong sense of belonging in their school environments, with approximately 98% of youth reporting that they felt they belonged at their school.

In general, many youth felt that the exchange of practical support was lacking in their neighborhoods. Approximately 46% of youth indicated that their community does not meet and work on solving problems together and 40% of youth indicated that people in their neighborhoods do not ask each other for advice or watch over one another's property. The perception of low levels of social involvement by adults in their communities translated into low expectations for assistance from adults residing in the community of the youth surveyed. Twenty percent of youth surveyed reported that adults in their neighborhoods were unlikely to do something to stop a fight, 34% reported that it was unlikely that their neighbors would do something about children skipping school or spraying graffiti on buildings, and 45% reported that it is unlikely that people in their neighborhood would do anything if a child was showing disrespect to an adult. Many youth also reported that it was unlikely that their neighbors would know if neglect or abuse was occurring in a home and only 40% of youth surveyed indicated that they felt their neighbors would report neglect or abuse if they knew it was occurring.

Alcohol and drug use/abuse was reported as a concern in their neighborhoods by many youth participating in the outreach survey. Sixty percent of students felt that drinking was a problem on some level in their neighborhood community and 30% felt that drug use was a problem. Severe problems with alcohol (35%), drug sales (17%) and drug use (12.6%) in local neighborhoods were reported by youth.

In turn, living in high risk neighborhoods may be contributing to high risk behaviors for youth. Though all respondents in the youth survey are under the legal drinking age, an alarming 52% reported drinking alcohol for 40 days or more in their lifetime, and 25% indicate having at least tried marijuana on 1 occasion. Additionally, almost all youth reported have taken prescription drugs without a prescription; a third of youth have done so more than 3 times and 18% of youth appear to have a regular prescription drug habit, and report taking prescription drugs without a prescription on 40 or more occasions.

Safety was a central concern for many of the youth participating in the survey. Twenty five percent of youth reported that they have felt unsafe at home or at school, and 75% of youth participating in the survey indicated that they have stayed home from school at least 1 day because they did not feel safe at school or going to or from school. Eight percent of youth reported that they do not feel safe in their neighborhood and 68% reported feeling only 'somewhat safe'. Sixty five percent of youth reported they would spend more time outside if they felt their neighborhood was safer. All youth surveyed (100%) reported that gangs operate in the neighborhoods in which they live, 51% indicated that they felt that gang activities in their neighborhood were very serious, and 51% indicated that they felt gangs were more of a problem in their neighborhood now than a year ago. Twenty-eight percent also felt that gunshots and shootings were a problem in their communities and many youth reported living in neighborhoods where loitering (31%), graffiti (35%), and trash in public areas (35%) were problems.

## **Conclusion**

Preliminary data analysis of the youth outreach survey data indicate high rates of violence and related risk factors among youth in Hillsborough County. While many students report the presence of adults in their life, they also report low rates of social support and social cohesion in the neighborhoods in which they live and many report low confidence in the willingness of adults in their communities to take pragmatic or social steps to intervene in adverse circumstances such as reporting abuse or neglect cases, or intervening to stop a fight. Given that many youth also report high rates of adverse environmental conditions in their local neighborhoods including exposure to gangs and problems with alcohol, illegal and prescription drugs, it is not surprising that a significant number of youth also report feeling unsafe at home or in their community, and report personal engagement in high risk behaviors such as alcohol and prescription drug use at alarming rates given the age of the population surveyed. The ubiquitous nature of the information gathered by the youth indicate that a holistic and comprehensive approach to violence prevention is needed that includes not only attention to youth themselves, but to neighborhoods, families and parent groups, community agencies, media, and business. A primary prevention approach is clearly needed, with efforts to assure that children and youth are supported, monitored, and cared for from early childhood through adolescence. The increase in gang activity is a serious concern strongly reflecting the need for safety and belonging on the part of youth. The lack of community activities and supervision for youth needs to be addressed directly, as do issues of environmental safety and planning. Without a comprehensive plan to address the matters delineated by the youth surveyed, the problems identified will only continue to grow. It is a positive sign that the schools are seen by youth as a place that they belong and are safe, and this feeling needs to extend beyond the school walls and into the rest of our community.

## **Limitations and Directions for Future Research**

Data collected for the purpose of this work are limited by several factors. While the survey attempted to collect data from a diverse representation of students in Hillsborough County, data are limited by the nature of students targeted in recruitment at traditional high-schools and by differential response rates across varying education sites (i.e. only 18% of students in civil citation/diversion programs and 18% of students in court involved/detention programs participated). Given that participants in traditional high-schools were targeted for recruitment via materials distributed in sociology or psychology elective courses, it is important to be mindful that data collected may not represent the perspectives of students outside of these programs. If, for example, choice of enrollment in high-school electives is influenced by economic or social factors, it is possible that socio-economic bias may have influenced the outcomes of data collected. Given the nature of courses targeted, it is likely that this bias would result in under-reporting of violence and associated community based risk factors. Data collected are also self-reported in nature and as such are limited by students ability to recall necessary information and their willingness to share honest perspectives. Difficulties in recall are evidenced by the low

number of students (N=887; 44%) who were able or willing to provide zip code information for their place of residence. While analysis of this data is still worth investigating, this will limit the ability of data collected in assessing risk factors for violence across neighborhood regions.

Despite its limits, these data are well poised to offer insights into risk and resilience in the area of violence for youth in Hillsborough County. While beyond the limits of this preliminary report, next steps in data analysis should include an assessment of the association neighborhood level characteristics with safety and well-being as measured by survey items, as it is possible that neighborhood (zip code) analysis could elucidate information to help us better understand the degree to which economic status is correlated with violence and well-being in Hillsborough County. Additionally, correlates of perceived safety and well-being in youth in Hillsborough County at the individual and family level (i.e., exposure to drugs, drinking, alcohol use, mental health, family connection, regularity of school attendance, etc.) should be examined using bivariate and multi-level data analysis techniques to identify potential targets for policy and practice change/intervention.

# Appendix V: Logic Model

## Violence Prevention Collaborative of Hillsborough County

### Vision

Working together to build strong families, safe schools and healthy neighborhoods.

### Goals

Support the health and well-being of all families.

Cultivate a strong, connected community.

Improve conditions in neighborhoods most impacted by violence.

Coordinate efforts to maximize our impact.
